

# GIS Maps - Essential Features

MásDesign supports the incorporation of maps in every design and development project and views maps as fundamental analysis and visual tools. No matter whether you have experience with GIS professionally or would generally like to learn about essential basics in designing a map for an individual project, MásDesign believes everyone participating in design or development should have access to public guidelines.

Our **GIS Maps Essential Features** are exactly those public guidelines, a quick one-stop reference to use to ensure your maps have all the critical details that will make them clear, legible, complete, and effective tools overall for all relevant users and all relevant uses.

To learn more about GIS and maps (beyond this resource), please visit MásDesign online here: [www.MásDesign.com](http://www.MásDesign.com) - there, you will find articles on GIS and effective cartography.
